AUTOSTRIPPER® BALE COMPACT

Automatic Dewiring for Pulp Bales

AutoStripper® is a line of products for Pulper Feeding equipment which includes automatic dewiring for all types and sizes of bales.

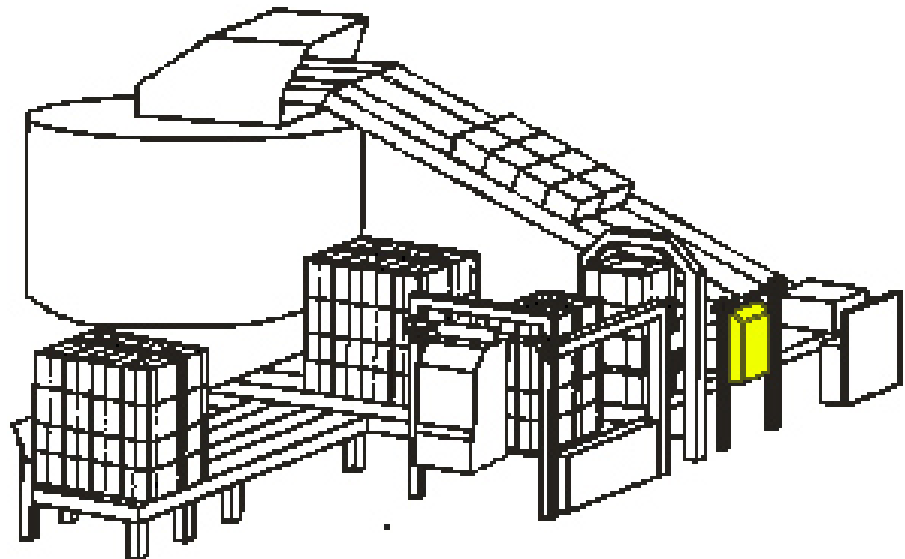

The AutoStripper® Bale Compact is developed for low and medium capacity mills, where cost efficiency and space saving are key features.

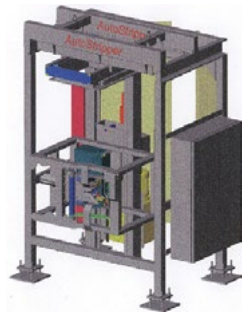

The AutoStripper® Bale Compact can be installed in most existing manual dewiring stations without major modifications. It will automatically:

- › Detect, catch and cut the wires.
- › Wind the wires into a compact coil.
- › Feed the coil to a suitable scrap container or a scrap conveyer

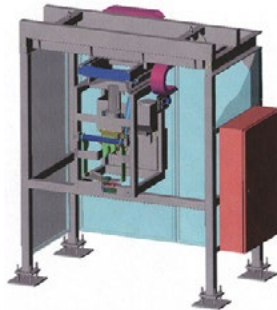

The machine is self-contained and will be supplied complete with PLC control and hydraulic unit.

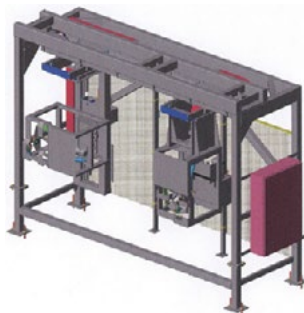

There are three standard versions of the AutoStripper® Bale Compact:

For Finnish domestic 1000 kg bales.
Capacity: 45 bales/h including transport.

For international standard 250 kg bales.
Capacity: 60 bales/h including transport and turning of the bale.

Duo, for both international standard bales and Finnish domestic bales.
Capacity: 120 bales/h international standard or 45 bales/h Finnish domestic bales.
