AUTOSTRIPPER® WIRE WINDER

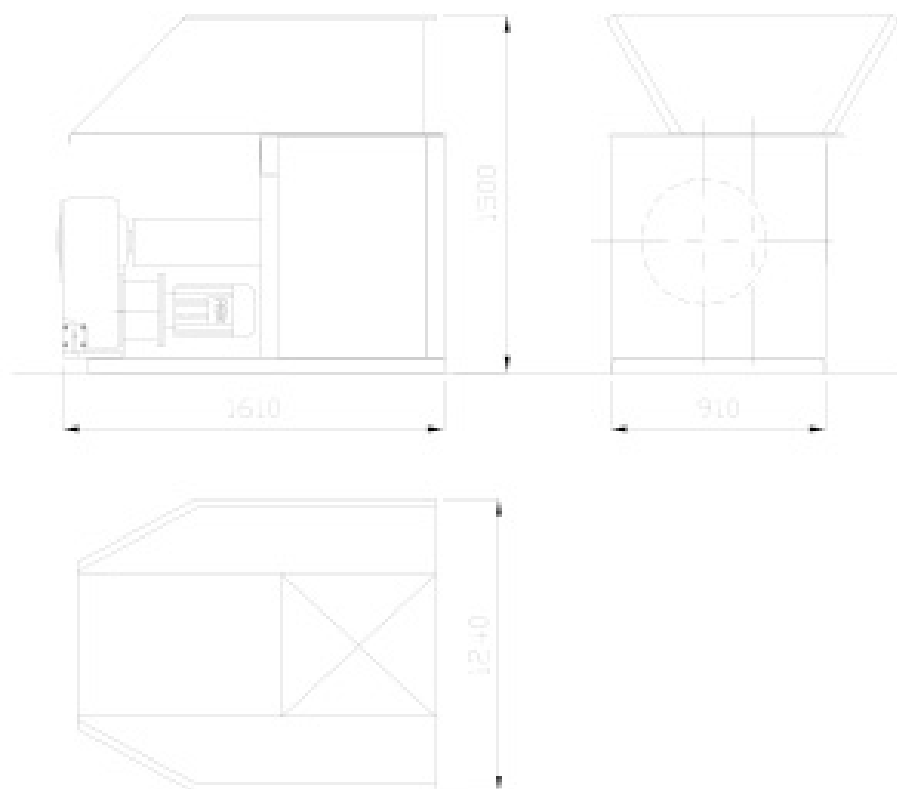

Wire Winder

AutoStripper® is a line of products for Pulper Feeding equipment which includes automatic dewiring for all types and sizes of bales.

The Wire Winder winds straps and wires from waste paper and pulp bales into compact rolls which are attractive to the steel recycling industry. It's the ultimate solution to the problem with loose wires around the dewiring station.

The Wire Winder can be used for manual dewiring or as an integrated part of the AutoStripper® system.

The machine is self-contained and comes complete with control cubicle with push buttons, motor starter, etc.

Technical data

Weight:	1300 kg
Motor capacity:	Normally 5.5 kW
Air pressure:	Normally 1.5 bar
Coil weight:	100 kg
