**AUTOSTRIPPER® CHAIN CONVEYORS**

## Chain Conveyors

AutoStripper® is a line of products for Pulper Feeding equipment which includes automatic dewiring for all types and sizes of bales.

Chain Conveyors for both market pulp bales and bale units. Including turntables, cross transfer carriages, elevators, etc.

Straight conveying line for single bales.

Traveling chain conveyor for single bales.

Turntable with chain conveyor.

#### Technical information

- › Chain type in accordance with ISO 606 - 1982, single (bales) or multiple (units), pitch 1", straight or dented (for inclined conveyors).
- › Tensioning by adjustable rubber torsion element which assures smooth operation in both directions.
- › Speeds typical 0,2 m/sec for units, 0,4 m/sec for single bales.
- › Chain drives by shaft mounted gear reducers.
- › Traveling drive by gear reducer with built in wheels.
- › Turning drive by ingenious pneumatic drive assuring smooth operation.
